REPLACEMENT CHOKE TUBES ARE AVAILABLE FOR MANY OTHER FIREARMS.
* All trade marks and logos are registered of their respective manufactures.

The crew at Carlson's Choke Tubes test thousands of shotgun shells and choke tube combinations each year. This testing allows us to offer you the best possible performance, both on the range and in the field.

2022 will mark 34 years in business for Carlson's Choke Tubes. For the last 33 years, we have been able to grow and improve our line of choke tubes. This has come from patterning tens of thousands of shells and using all different makes and models of shotguns. By examining patterns and making adjustments to things such as the parallel section, finish, and diameters, we are able to provide an affordable product that performs as you would expect in the field and at the range. Over the last few years we have grown our product line and some of this can be attributed to the Electronic Patterning Board (EPB) that we have at our disposal. This technology allows us to see various things such as point of impact (POI), pattern percentage, and pattern density. Using our EPB, we are able to get more accurate data than by doing this manually. This advantage is passed on to the customer by allowing us to design better choke tubes and gives our techs more information to pass along to our customers. We pride ourselves on our customer service and encourage customers to contact us any time they have a concern or question. We back our product with a lifetime warranty! With all of this experience and technology there are still unforeseen variables which is why we stress that the customer pattern his or her gun to know exactly how the gun will perform using a specific load and choke combination. You don't go deer hunting without sighting-in your rifle and scope, and we suggest using the same line of thinking with your shotguns. Be certain to pattern your shotgun before you use it in the field with the load and choke tube you plan to use.

GOOD LUCK HUNTING & SHOOTING!

Carlson's

The Shooter's Choice

Choke Tubes, LLC

PATTERNING & IMPORTANT CHOKE TUBE INFORMATION

CARLSON'S CHOKE TUBES are made from hardened 17-4 stainless steel with a Rockwell Hardness of 43 and on the Rockwell 15-N scale 82. This allows us to build choke tubes that you can shoot steel shot in a full choke constriction. When shooting steel shot, always shoot a more open choke than with lead because steel patterns are tighter at the same distance than lead shot.

SHOOTING LEAD SHOT vs. STEEL SHOT

Steel Shot will pattern tighter. Use the following as a guide.

SHOOTING THIS CHOKE WITH LEAD

Skeet Choke
Improved Cylinder Choke
Modified Choke

WILL PATTERN LIKE THIS CHOKE WITH STEEL

Improved Cylinder Choke
Modified Choke
Full Choke

Constriction Guide for 12ga and 20ga

Constriction	Measurement
Cylinder (Bore Diameter)	.000
Skeet	.005
Improved Cylinder (IC)	.010
Light Modified (LM)	.015
Modified (MOD)	.020
Improved Modified (IM)	.025
Full	.030
Extra Full (EF)	.040
Coyote & Turkey (TKY)	.045+

Constriction	Lead Yardage	Steel Yardage
Cylinder (Bore Diameter)	0-15	0-20
Skeet	5-30	10-30
Improved Cylinder (IC)	15-35	15-40
Light Modified (LM)	15-40	20-45
Modified (MOD)	20-45	25-50
Improved Modified (IM)	30-45	30-55
Full	40-50	50+

CARLSON'S EXTENDED STEEL CHOKE TUBES & SPORTING CLAYS CHOKE TUBES

These chokes pattern better with steel shot and throw 10-15% denser patterns than flush mount choke tubes. Lead, Hevi-Shot, Bismuth, and Tungsten Polymer may be used in all Carlson's Choke Tubes. Tungsten Iron Shot should be treated the same as steel shot.

We recommend extended choke tubes for high velocity steel. Do not use any constriction tighter than Improved Modified with fast steel shotshells. No Steel shot bigger than BB or faster than 1550 FPS should be used through a full choke.

IMPORTANT INFORMATION ABOUT OUR PRODUCTS

Never shoot BBB, T, or F steel shot through ANY flush mount choke tube tighter than Improved Modified.

CARLSON'S TURKEY CHOKE TUBES have tighter constrictions than standard choke tubes. Steel shot larger than #4 should not be used in any Turkey Choke. Hevi-Shot, Lead, Copper, Nickel, Bismuth, & Tungsten Polymer Shot can all be shot through CARLSON'S TURKEY CHOKE TUBES. We have had the best pattern results with #4, #5, and #6 shot sizes.

We back all of our choke tubes with a lifetime warranty and are here to answer your questions 8:30-5:30 CST Monday through Friday. We are committed to your satisfaction. All of us here at Carlson's are hunters or shooters and are willing to listen to your needs. We appreciate your business and thank you for choosing our precision made chokes for your next hunt or range session.

Good Luck Shooting and remember...

THINK SAFETY FIRST!

Carlson's TST Technology

TST: (Triple Shot Technology) is a series of three graduated rings in the taper section of the choke tube which allows for a more gradual transition from the shotgun's bore to the final constriction/parallel section of the choke tube.

Carlson's Choke Tubes

Whether you shoot at the range or in the field, Carlson's Xtreme Density Performance Choke Tubes can help you realize your true shooting potential. Bust more birds and fill your game bag faster by using Carlson's Choke Tubes. The best shooters in the world use them, because they know if you want to be the best, you have to shoot the best!

CREMATOR®

NON-PORTED

PORTED

These chokes feature our brand new Triple Shot Technology. TST is a series of three graduated rings in the taper section of the choke tube, that allows for a more gradual transition from the shotgun bore to the final constriction. The Cremator® series conveys a host of benefits to the shooter, like reduced pellet deformation, less flyers, and denser patterns. You also get all the benefits of an extended choke tube, including a 25% longer parallel section for tighter and more

dense patterns, wrench-less installation/quick removal, and muzzle protection. They are offered in your choice of ported or non-port configurations, with a matte black finish. Like all of our choke tubes, the Cremator® series carries a lifetime warranty, and are constructed out of our premium 17-4 stainless steel.

20ga Cremator® choke tubes are only offered in Ported

*NOTE: Remington Pro Bore & Optima HP Long Range Choke Tubes: DO NOT USE Steel Shot larger than #2. ALSO NOTE: Pro Bore Chokes have 2 rings, not 3.

*NOTE: Remington Pro Bore & Optima HP Long Range Choke Tubes: DO NOT USE Steel Shot larger than #2.
ALSO NOTE: Pro Bore Chokes have 2 rings, not 3.

The Cremator® 2-Pack set comes with both Mid Range & Long Range choke tubes and a free universal choke wrench. This combination allows the shooter to purchase both the MR and LR chokes at a discounted price. The Mid Range choke is excellent for shooting distance of 20-40 yards and the Long Range is best used for shooting beyond 40 yards. The NEW line of Cremator® choke tubes features our TST technology and the ability to shoot any lead, steel, or Hevi-Shot load regardless of size or speed. These chokes come backed by Carlson's Lifetime Warranty!

NEW!

CREMATOR® WATERFOWL 3-PACK

Carlson's **Exclusive** Cremator 3-Pack. Now you can get the full line of Cremator choke tubes (Close, Mid, & Long Range) in a green choke tube case to keep in your blind bag!

NEW!

Our New Bismuth Bone Buster choke tubes are designed to produce excellent, dense patterns with all Bismuth ammunition. CNC precision machining from 17-4 heat treated stainless steel featuring a longer parallel section (inside the choke) over conventional factory choke tubes. Combine this with extensive testing with various loads and you have the perfect choke to deliver devastating patterns with Bismuth! Available in Mid Range (.025 constriction) and Extended Range (.040 constriction). The Bismuth chokes can be used with all lead and Hevi-Shot loads. The Mid Range choke tube can be used with all steel shot while Extended Range choke tube can be used with all steel shot not larger than #2. Experience the Bone Crushing dense patterns with these NEW Bismuth Choke Tubes. These chokes come with Carlson's Lifetime Warranty!

SNOW GOOSE CREMATOR

Snow Goose Cremator® Choke Tubes feature a White Cerakoted finish. The Cerakote finish offers an industry leading corrosion, abrasion and chemical resistant protective coating that results in longer product lifespan with a low-glare custom look.

Snow Goose Cremator® Choke Tubes feature our brand new Triple Shot Technology, and are offered in close, mid, and long range constrictions. TST is a series of three graduated rings in the taper section of the choke tube, that allow a more gradual transition from the shotgun bore to the final constriction. The Cremator series conveys a host of benefits to the shooter, like reduced pellet deformation, less flyers, and denser patterns.

The Cremator® series has no size or speed restrictions, allowing steel shot in any of the three constrictions. You also get all the benefits of an extended choke tube, including a 25% longer parallel section for tighter and more dense patterns, wrench-less installation, quick removal, and muzzle protection. They are offered in your choice of ported or non-ported configurations. The Cremator® series carries a lifetime warranty, and are constructed out of our premium 17-4 stainless steel.

*NOTE: Remington Pro Bore & Optima HP Long Range Choke Tubes: DO NOT USE Steel Shot larger than #2.

FEDERAL PREMIUM

BLACKCLOUD®

Federal's Black Cloud™ ammunition features devastating penetration which can now be delivered with unique features that help downrange performance increasing hunter success. The Black Cloud Choke Tube is constructed of a Titanium-coated stainless steel and comes in Mid-Range and Long-Range Models. The titanium coating helps the uniquely designed New Flex and FliteControl Wad in the Black Cloud™ ammunition perform downrange with less build-up in the choke and allows the Flitestopper shot to do its job, thus increasing your take in the field.

These chokes are specifically designed to get the most performance from Federal's new Black Cloud Ammunition, but perform extremely well with other steel shotshells. The Long Range choke tube should not be used with any steel shot larger than BB or with any steel shot faster than 1550 fps. The Mid Range model can be used with all steel shot sizes. Black Cloud™ ammunition has been designed to be used with choke tubes that do not use porting or wad stopping devices. This choke is backed by Carlson's lifetime warranty.

DELTA WATERFOWL CHOKES

Our entire line of steel shot choke tubes pattern steel shot extremely well. These choke tubes feature a longer parallel section allowing for less flyers and denser patterns. These choke tubes extend 3/4" outside the barrel eliminating damage to your barrel caused by prolonged steel shot use. The longer parallel section allows for use of larger steel shot in tighter choke constrictions. They are made of 17-4 stainless steel with a knurled extension and a matte black finish. Each choke tube carries a lifetime warranty.

Close Range Delta Waterfowl Choke Tubes—For hunting over decoys, performs best in situations up to 35 yards. Mid Range Delta Waterfowl Choke Tubes—For those situations where you are shooting 25 to 50 yards. Long Range Delta Waterfowl Choke Tubes—For taking shots 40 yards and up. This is also a good choice for the varmint hunter using larger size shots. No steel shot bigger than BB or faster than 1550 FPS should be used through the full or long range choke tube. A portion of all sales go to help delta with waterfowl conservation.

*NOTE: Remington Pro Bore Long Range Choke Tubes: DO NOT USE Steel Shot larger than #2.

Our Delta Waterfowl Choke Tubes are manufactured from 17-4 stainless steel and are designed to throw tighter and denser patterns than conventional choke tubes. These choke tubes feature a 25% longer parallel section in the choke, thus throwing more consistent patterns. Each choke tube is knurled on the end to allow for quick and easy removal. Each choke tube has the constriction and type laser marked on the end and body for easy reference.

Steel shot may be used through these choke tubes with exceptional results. Do not shoot steel shot larger than BB or any steel load faster than 1550 FPS through the Long Range Constriction. Loads that exceed this size and speed should be used with the Mid Range choke tube. These chokes are backed by Carlson's lifetime warranty.

BLIND SIDE® WATERFOWL CHOKE TUBES

Carlson's Blind Side® Choke Tubes allow Winchester® Blind Side® HEX™ Steel Shot and Diamond Cut Wad to do its job and helps deliver devastating downrange patterns. This choke tube performs equally well when used with other steel shot loads. Carlson's Blind Side® Choke Tube is a proven performer on waterfowl using all steel shot loads over extended distances. This choke is also designed to shoot lead, plated copper and nickel shot, as well as all Hevi-Shot® ammunition with great results.

PLEASE NOTE: Our Mid-Range Choke Tubes can be used with all steel shot ammunition. The Extended Range Choke Tube should not be used with any steel shot size larger than BB or with any steel shot faster than 1550 fps.

HEAVYWEIGHT® TSS

Carlson's TSS Turkey Choke Tubes are optimized for Federal Premium® Heavyweight® TSS Turkey Loads but also work exceptionally well with other manufacturer's turkey ammunition (Smaller shot size 7-9). The Federal Premium's Heavyweight TSS Turkey Load has an incredibly high pellet count in both 7 and 9 shot. Combining this with the ability to carry energy further makes them ideal for 12ga, 20ga, & .410 shotguns. Tungsten Super

Shot (TSS) has a 22% heavier density than heavyweight shot and a 56% heavier density than traditional lead shot. It puts the maximum amount of pellets possible in a 10" circle at 40 yds. The 12ga, 20ga, and .410 shells will include the FliteControl Flex™ wad that gives hunters the ability to shoot any choke tube they prefer. Long-range turkeys don't stand a chance.

LONG BEARD™ XR

LOK'D & LETHAL™

Our Long Beard™ XR Choke Tube is manufactured from 17-4 stainless steel and has been specially designed to produce the best patterns when shooting Winchester's New Long Beard™ XR Turkey loads. This new ammunition features Shot-Lok™ Technology that allows for the tightest patterns and longer downrange reach over any turkey load on the market. Pair this ammunition's capabilities with the new Carlson's Long Beard™ XR Turkey Choke and you have a devastating, gobbler-killing combination. This choke tube features a 25% longer parallel section thus throwing tighter and denser patterns downrange.

TST Triple Shot Technology

- LESS FLYERS
- DENSER PATTERNS
- REDUCED PELLET DEFORMATION
- SEE PAGE 3 FOR CUTAWAY TST

NEW!

THE OFFICIAL CHOKE TUBE OF BONE COLLECTOR™

BONE COLLECTOR™

BACK

FRONT

Carlson's Bone Collector™ Turkey Choke Tubes are designed to throw tighter and denser patterns, at longer distances, than conventional choke tubes. Each choke is manufactured with a longer parallel section constricting shot gradually with few deformed pellets resulting in tighter denser patterns. These choke tubes have a non-reflective matte black finish and are manufactured from 17-4 heat treated stainless steel. Our turkey chokes are designed to handle all lead, nickleplated, copperplated, Bismuth, Tungsten, Hevi-Shot, TSS, and steel turkey loads smaller than #4. Each choke tube constriction has been pattern tested and has thrown the best patterns with 4 through 10 shot.

NOTE: Carlson's Turkey Choke Tubes can shoot steel shot no larger than #4

**NOTES: Carlson's Turkey Choke Tubes can shoot steel shot no larger than #4
TSS Turkey loads may be used in all of our Turkey chokes**

Carlson's Extended Turkey chokes are designed to shoot all lead and Hevi-Shot loads. These chokes feature a knurled end (approximately 3/4") and a 25% longer parallel section to help produce very tight/dense patterns that stop gobblers dead in their tracks. These chokes are sure to be the go-to for any turkey hunter!

The NEW White Wing Dove choke features Carlson's Exclusive TST (Triple Shot Technology) which results in reduced pellet deformation, denser patterns, and less flyers. Our White Wing Dove choke is manufactured from 17-4 stainless steel and has been designed to produce the best patterns for dove hunters. For all ranges, when hunting doves we guarantee the reliability and

performance dove hunters want and deserve. Available in Decoy (LM) "15 to 35 yards" or Extended Range (IM) "30 yards and beyond" all White Wing chokes are ported to help reduce recoil and muzzle jump. These chokes can handle steel, lead, Hevi-Shot, and TSS as some public grounds stipulate shot composition. As always we guarantee peak performance and user satisfaction.

ROOSTER™

LOK'D & LETHAL™ XR

Our Rooster XR choke tube is manufactured from 17-4 stainless steel and has been specifically designed to produce the best patterns when shooting Winchester's New Rooster XR ammunition. Featuring the new Shot-Lok™ Technology that produces the tightest patterns and highest down range energy when compared to other game loads on the market. These chokes come in either Early Season (LM) or Late Season (IM) constrictions to accommodate nearly all hunting situations. Each choke is ported allowing the gases to escape quickly reducing recoil and muzzle jump in the process. We have designed these chokes to handle lead, steel, or Hevi-Shot so they can be used for either upland game or waterfowl hunting with great results.

The unique FLITECONTROL® wad in Prairie Storm™ Ammunition will deliver inconsistent patterns in ported chokes or when used with wad stopping or stripping devices. This choke uses a special field-tested constriction and length to get the most from Federal Premium Prairie Storm™ Ammunition. Carlson's Titanium Coated choke tube allows Federal's special FLITESTOPPER lead pellets and FLITECONTROL® wad to deliver devastating downrange patterns.

This choke performs equally well when used with lead, copper, nickel, Hevi-Shot and steel shot loads. Carlson's Prairie Storm™ choke tube is a proven performer on pheasants and upland birds using all lead and steel shot loads over extended distances.

PLEASE NOTE: The EARLY SEASON choke tube is a LM constriction and the LATE SEASON choke tube is an IM constriction. All sizes and speeds of Steel shot may be used in either choke tube. This choke is backed by Carlson's lifetime warranty.

3 GUN CHOKE TUBE SET

Pictured: 3 Gun Shooter Corinne Mosher

Improved Cylinder with .010 constriction
- Works well shooting from 15 to 30 yards

Light Modified with .015 constriction
- Works well shooting from 20 to 40 yards

Improved Modified with .025 constriction
- Works well shooting from 30 to 45 yards

Blue plastic 3 choke case

Carlson's 3-Gun set is designed specifically for the use in 3-Gun competitions. This 3 piece choke tube set allows the shooter to select the desired choke constriction needed at every stage. These chokes are laser etched on the body and head for easy identification. The 3-Gun choke tubes are manufactured from heat treated 17-4 stainless steel and extend 3/4" out the end of your barrel and are designed to shoot Lead, Steel, TSS, and Hevi-Shot loads. Our 3-Gun Choke Tube Set will also work in other target shooting and hunting situations.

Slugs may be used in the IC & LM choke tubes.
Slugs may NOT be used in the IM choke tube.

CARLSON'S AUTO CATCHER For 12 & 20 GA Right Handed Semi-Auto Shotguns

AUTO CATCHER

Item#	Description	Price
00440	Auto Catcher (Right Hand Eject Only)	\$19.95
00441	Additional 2-Pack Adhesive	\$4.95

Carlson's 12 Gauge Auto Catcher is an all-steel shotgun shell catcher that prevents empty hulls from being ejected through the receiver opening on semi-automatic shotguns and holds the empty hulls for easy removal. One model works with all 12 & 20 gauge semi-auto shotguns. Save your hulls from distracting you or others at the range while keeping empties from hitting the ground. Simply peel off the double-faced tape (2 included with the auto catcher) and attach to the gun's receiver. The semi-permanent adhesive can be removed if desired. Softly padded tape acts like a barrier, keeping the metal plate away from the gun. There is no movement or vibration to scratch the receiver's finish. The Auto Catcher can be adjusted to fit different shotshell loads and guns where needed. Simply close or open the ends of the wire with no modifications to the gun.

Trap Pak Includes the following:

16 Yard choke tube with .015 constriction

- Works well 16 to 21 yard line while trap shooting
- Exceptional results out to 40 yards when hunting

22 Yard choke tube with .020 constriction

- Works well 22 to 26 yard line while trap shooting
- Exceptional results out to 50 yards when hunting

27 Yard choke tube with .030 constriction

- Works well from 27 yard line and beyond while trap shooting
- Exceptional results beyond 50 yards when hunting

Orange plastic 3 choke case

TRAP PAK: THE COMPLETE TRAP SHOOTER SET

16 Yard, 22 Yard, & 27 Yard Choke Tube Set!

Carlson's Exclusive TRAP PAK takes the guessing game out of trap shooting! This three choke set with free case is easily identified with the appropriate shooting yardage lasered on the extended heads of the choke tubes. Carlson's exclusive offer includes a 3 choke tube case to keep your choke tubes safe inside your shooting bag. Our TRAP Pak

is manufactured from 17-4 heat treated stainless steel and designed to throw tighter and denser patterns than conventional choke tubes. These choke tubes feature a 25% longer parallel section in the choke, thus throwing more consistent patterns. Each choke tube is knurled on the end to allow for quick and easy removal. These choke tubes have the constriction and size laser marked on the end and body for easy reference. Steel Shot may be used through these choke tubes with exceptional results. Remember to pattern your shotgun choke tube with the specific shotshell load you are going to be using. Different brands of ammunition throw different patterns from the same choke tube.

Do not shoot steel shot larger than BB or any steel loads faster than 1550 FPS through the 22 & 27 yard choke tube. Slugs, sabots, and rifled slugs are not to be used in any of these choke constrictions.

* No steel shot larger than #2 in 22 & 27 yard choke tube.

16 YARD TRAP CHOKE TUBE

Our 16 Yard Trap Choke is manufactured from 17-4 stainless steel and designed to throw tighter and denser pattern over conventional flush choke tubes. These choke tubes feature a 25% longer parallel section in the choke, thus throwing more consistent patterns. Each choke tube is knurled on the end to allow for quick and easy removal. Each choke tube has the constriction and size laser marked on the head and body for easy reference.

The 16 Yard Trap Choke is safe to shoot all Hevi-Shot, Lead, Steel, Copper, TSS, and other non Toxic ammunition out of.

DO NOT shoot slugs, sabots, or rifled slugs through the 16 Yard Trap Choke.

PORTED SPORTING CLAYS

Our Ported choke tubes help to reduce recoil and muzzle jump making your follow up shots quicker while staying on target. Manufactured from 17-4 heat treated stainless steel while precision machined with 25% longer parallel sections over flush choke tubes. The extended portion of the choke tube allows for quick and easy removal and insertion. Steel, Lead, Copper-plated, Nickel, Hevi-shot, Bismuth, and tungsten may be shot through these choke tubes. When using steel shot do not shoot steel larger than BB or speeds faster than 1550fps through any choke tighter than full. These choke tubes are available in a matte black finish or Titanium Gold finish that strengthens the tube while protecting them with corrosion resistance. These chokes are backed with our lifetime warranty and made in the USA!

Stainless or Black Finish

12 Gauge Sporting Clays Choke Tubes

Our Sporting Clays choke tubes are made from 17-4 heat-treated stainless steel and are precision machined to produce a choke tube that patterns better than standard choke tubes. These choke tubes feature a 25% longer parallel section in the choke thus throwing more consistent patterns than conventional choke tubes. Extended choke tubes protect the end of your barrels and have knurling on the end to allow for quick and easy removal. Each choke tube has the constriction laser marked on the end for easy reference. Lead, Copper-plated, Nickel, Hevi-Shot™, Bismuth, Tungsten or Steel Shot may be used in these choke tubes. These choke tubes are backed by our Lifetime Warranty.

20 GA SPORTING CLAYS CHOKE TUBES

Sporting clay choke tubes are made from 17-4 stainless steel and are precision machined to produce a choke tube that patterns better than flush mount choke tubes. These choke tubes feature a 25% longer parallel section in the choke thus throwing more consistent patterns than conventional choke tubes. Lead, Copper-plated, Nickel, Hevi-Shot™, Bismuth, Tungsten, or Steel Shot may be used in these choke tubes. For best results, pattern your choke tube with the specific shotshell load you will be using in the field. Different ammunition patterns differently from the same choke tube.

20 Gauge Sporting Clays Choke Tubes

Carlson's Coyote Choke Tube

This choke is for use with Hevi-Shot, Bismuth and lead. This high performance choke tube has been specifically designed for the coyote hunter to deliver devastating down-range patterns upwards of 70 yards when shooting larger shot sizes. Produces very dense patterns with T-shot, #4 buck and BB predator loads. Great for turkey and predator hunting. NOT FOR USE WITH STEEL SHOT LARGER THAN #4.

CARLSON'S COYOTE CHOKE DELIVERS DEVASTATING KNOCKDOWN POWER!

CARLSON'S RIFLED CHOKE TUBES DESIGNED TO PERFORM. BUILT TO LAST

These precision Rifled Choke Tubes are manufactured from 17-4 heat treated stainless steel. Each choke tube protrudes .625 to 1.3 inches from the end of the barrel depending upon which type of firearm the choke tube has been specifically designed for (see chart type). Each choke tube has a right hand rifle twist, which is 1 in 35. Each choke tube has a groove diameter of .730 of an inch in 12ga. These choke tubes have a matte black finish and carry a lifetime warranty. If you're looking for improved accuracy from a smooth bore barrel these fine choke tubes will improve your groups. Works with slugs, rifled slugs and sabots.

CARLSON'S PORTED BUCKSHOT CHOKE TUBES DENSE PATTERNS WITH 00 & 000 BUCKSHOT!

Our Ported Buckshot choke tube is designed to give you tight patterns downrange with 00 & 000 buckshot. This choke is ported to reduce recoil and muzzle jump that tend to go hand in hand with these large loads. This choke features a constriction designed specifically to optimize patterns with large and small loads alike. This choke will extend about 1" out of the barrel and has a black finish. Machined out of 17-4 heat treated material this choke can be used with Lead, Steel, and Hevi-Shot loads.

Carlson's Tactical Muzzle Brake

The Carlson's Tactical Muzzle Brake choke tube features a porting designed to reduce recoil significantly. This new choke tube is manufactured from 17-4 Heat Treated Stainless Steel in your choice of either Cylinder or Extra Full constriction. The Cylinder Choke Tube may be used with ALL shot shells including Lead, Steel, Hevi-Shot, and even slugs! The Extra Full choke tube can be used with all Hevi-Shot and lead loads (but is not to be used with slugs and cannot be used with any Steel shot larger than #2 or with any Steel shot faster than 1550FPS). The Extra Full constriction is also an excellent choice for hunters using larger shot sizes for coyotes, wild hogs or deer. Turkey constrictions are not to be used with any steel shot larger than #4.

\$129⁹⁵

Carlson's Tactical Breecher Muzzle Brake

The Carlson's Tactical Breecher Muzzle Brake Choke Tube has a head that extends approximately 2.75" beyond the end of the barrel and features a matte black finish. The addition of this new choke will not only make any ordinary shotgun look extraordinary, but also significantly reduce recoil allowing for better control of your firearm and quicker follow-up shots. Perfect for Law Enforcement or Home Defense. These chokes are proudly made in the USA and feature Carlson's lifetime warranty!

Add firepower to your favorite shotgun. These magazine extensions are constructed of blued solid steel and most come with spring, base clamp, and a high visibility follower. The threaded tube replaces your magazine cap and gives you the ability to add extra rounds to your magazine. Easy to follow instructions are included. Our magazine extensions are great for home protection, competition shooting, and law enforcement. See chart for the make/model and the magazine capacity.

*12 ga. Remington 870 will also fit 16ga models.

Universal Shotgun Plug 2-Pack

Our universal shotgun plug kit allows you to easily decrease the shell capacity from 4 rounds in the magazine tube down to 2 rounds on most shotguns. The plug can be used without cutting but can easily be trimmed to length for other popular guns. Trimming the universal plug to length is best accomplished with a hand held set of pruning shears, PVC pipe shears or a hacksaw. Always start with the full plug and cut 1/4" to 1/2" off at a time until only 2 rounds fit in the magazine tube (For fitting purposes use the maximum size shell the shotgun is rated for).

PROFESSIONAL CHOKE TUBE INSTALLATIONS

We can install choke tubes in most shotguns that have fixed chokes including single and double barrel shotguns. With each choke installation you receive three stainless chokes of your choice, a speed wrench, and a universal wrench. We can install chokes in most 12ga., 20ga., and 10ga. shotguns.

Single Barrel Flush Mount Choke Installation (12ga. & 20ga.) Includes three flush mount chokes and 2 wrenches	\$150.00
Single Barrel Flush Mount REMINGTON Installation (12ga Only minimum OD of .875) Includes 3 flush mount chokes	\$195.00
Single Barrel Extended Choke Installation (12ga. & 20ga.) Includes three stainless extended chokes & 2 wrenches	\$190.00
Double Barrel Choke Installation (12ga. & 20ga.) Includes three flush mount chokes and 2 Wrenches	\$240.00
Double Barrel Choke Installation (12ga. & 20ga.) Includes three stainless extended chokes and 2 Wrenches	\$275.00
Single Barrel Choke Installation (10ga.) Includes three flush chokes & 1 wrench	\$210.00
Double Barrel Choke Installation (10ga.) Includes three flush chokes & 1 wrench	\$265.00
Chrome Lined Bore Extra Charge (each Barrel)	\$15.00
Additional Chokes (each) with installation	\$19.95 (Flush) and \$40.00 (Extended)
Install front sight (White, Orange or Green) and Mid Rib sight (sights included)	\$40.00
Lengthen forcing cone in barrel (12 gauge only)	\$65.00
O/U's Double per barrel (12 gauge only)	\$50.00
Shorten customer barrel re-install sight (vent-rib)	\$40.00
Shorten O/U's & Double barrels	\$85.00
Remove seized choke tube from barrel	min. charge of \$60.00

Please allow \$20.00 freight per single barrel (12 GA. and 20 GA.) and \$24.50 per double barrels, 10 GA. single barrels, or sporting barrel on all choke installations. 2-Day Turnaround.

* Freight charges are subject to change!

Please call 785-626-3700 if interested in having choke tubes installed in your shotgun!
Information required below:

10ga. Outside Diameter (OD.) required .890 for Small Diameter Tru-Choke

12ga. Outside Diameter (OD.) required .875 for Remington Chokes, .825 for standard Tru-Chokes, or .805 for Small Diameter Tru-Choke (Lead Only System)

20ga. Outside Diameter (OD.) required .700 for standard Tru-Chokes

DON'T SKIMP ON MAINTENANCE AND CLEANING!

Keep Your Firearms and Choke Tubes in Top Condition

\$13⁹⁵

CARBON CUTTER

Maintenance is Critical
Use the Best - Use Carlson's!

Carlson's Choke Tube Cleaner

Carlson's Choke Tube Cleaner & Carbon Cutter is non-flammable, non hazardous and is biodegradable. It provides you with a safe and effective way to clean carbon and plastic wad fouling from choke tubes and all of those semi automatic shotguns gas system parts. This product also works well to clean AR-15 and other rifle bolt assemblies. Completes the job in 15 minutes or less! Supplied in a 7oz jar.

Choke Tube Cleaner.....#06611

\$7⁹⁵

Choke Tube Lube

Birchwood Casey Choke Tube Lubricant is a fluo-ropolymer penetrating heavy duty grease lubricant. Applying a small amount of Birchwood Casey Choke Tube Lubricant to your choke tube will ease cleaning, reduce wear, and prevent your choke tubes from seizing with steel shot loads, heavy buffered turkey loads, or with repeated shooting. Birchwood Casey also fights friction and improves pattern performance in all choke tubes.

Choke Tube Lube #06610

\$11⁵⁰

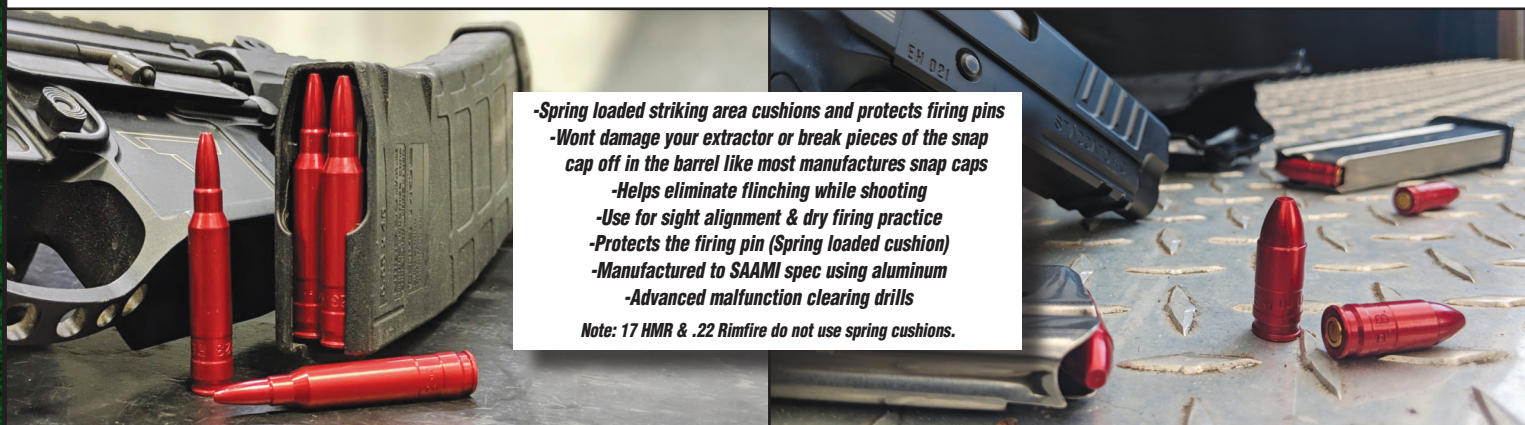

Carlson's Choke Tube Lube Syringe

Carlson's Choke Tube Lube is excellent for use on all choke tubes. Also works great on full-auto locking lugs, sears, bolts, and slide/rails. Smooth and clean operation in the severe cold (-100°F) and will hold up under extreme heat (+750°F) as well. This lube offers extreme pressure properties that are guaranteed to reduce friction and wear on weapons and choke tubes. This product will not attract dust, dirt, or powder fouling like most petroleum based products and does not contain Teflon or PTFE additives. Supplied in a 10 ml syringe.

Choke Tube Lube Syringe#06612

CARLSON'S ALUMINUM SNAP CAPS *For Rifles & Pistols*

- Spring loaded striking area cushions and protects firing pins
- Won't damage your extractor or break pieces of the snap cap off in the barrel like most manufactures snap caps
- Helps eliminate flinching while shooting
- Use for sight alignment & dry firing practice
- Protects the firing pin (Spring loaded cushion)
- Manufactured to SAAMI spec using aluminum
- Advanced malfunction clearing drills

Note: 17 HMR & .22 Rimfire do not use spring cushions.

Hunters Locking Swivels.....#00073

\$13.95 per pair

BERETTA & BENELLI CHOKE SYSTEM IDENTIFICATION

By using the photos shown below, you should be able to easily identify which Beretta/Benelli Choke Tube system your firearm utilizes.

Pic A) Standard Beretta/Benelli (Ber/Ben) Mobil Choke:

It can be identified by measuring a flush mount choke tube. The flush mount chokes in this system are 2" long and have threads located at the muzzle end of the choke (top of choke where choke notches are.)

Pic B) Beretta Optima Plus/Benelli Crio/Crio Plus:

Identified by measuring a flush mount choke tube. This choke system is 2-3/4" long & the threads begin 3/4" from the muzzle end of the choke. These two chokes have identical outside dimensions, however these chokes are based on two different bore diameters and should not be interchanged.

Pic C) Beretta Optima/Benelli Crio:

It can be identified by measuring a flush mount choke tube. It is 2-3/4" long and threads are located at the muzzle end of the choke (top of choke where choke notches are.) The Benelli Crio was in very few guns and is no longer being put into shotguns. Once again these two chokes have the same outside dimensions but are based on different bore diameters and should not be interchanged.

Pic D) Beretta Optima HP:

It can be identified by measuring a flush mount choke tube. It is 2-3/4" long and the threads begin about a half-inch down from the top of the choke. This is a New choke system that you find in the A-400 Xplor shotguns.

6 BENEFITS OF EXTENDED CHOKE TUBES

1 Longer Parallel or Choke Section

By extending the choke you create a longer parallel or choke section which will throw tighter and more dense patterns, thus more pellets where they need to be. This is the biggest plus - You simply get better patterns.

2 Barrel Protection:

The extended part of choke protects the end of your barrel from damage

3 Quick Removal & Installation

Extended chokes can be removed with your fingers allowing you to get them in and out of the shotgun quickly

4 Easy Identification:

Laser etched for quick reference so you know what constriction is in your shotgun.

5 Easy to Remove if There's Ever a Problem

In the event of a choke getting stuck due to maintenance issues (rust) or damage, you have an extended portion of the choke outside of the barrel which allows removal to be much easier. General care (grease on threads) and inspection will help prevent this.

6 Less Plastic Build-Up

We see less plastic build up in the entrance of choke tubes when they are extended since the taper section to the constriction or choke section is more gradual. Flush mount chokes in more open constrictions Cylinder through Improved Cylinder will throw similar patterns to their extended counterparts. The biggest difference comes into play in tighter chokes, heavy loads, field shotshells, steel shot, and turkey shotshells.
